For Immediate Release: May 10<sup>th</sup> 2011

## ***New Odyssey Suburban Demo hits the street***

Since 1990 Odyssey has always maintained market specific demonstration units using Suburbans, Expeditions, Tahoes, Pickups and Light Rescue Units. Odyssey now has a new Suburban is on the street available for demonstrations to all agencies and departments. Odyssey demos have been in trade shows and events from coast to coast and began this year at the FDIC show in Indianapolis, proudly on display in the GM Fleet booth.

The new Suburban demo includes many features as seen on previous demos along with new Odyssey specific features. Incorporated into this year's demo is the new "OdyLogic" electrical system which eliminated 50% of the wiring required while adding control features with programmable logic modules and battery monitoring. Between the front seats on the ceiling is the new "Premier" overhead speaker console containing three Motorola speakers, a red/white LED light and padding around the streamlined sides. On top of the light tower is a wireless color camera connected to a dual channel monitor on the dash and another on the rear video panel built into the rear hatch within easy view. In addition, a roof mounted FLIR Thermal camera can be viewed from either location and includes a remote control on the front console and rear radio panel. Designed by Odyssey for mounting light towers and other equipment to the roof of an SUV or pick up is their "CRMS" mounting system. The "CRMS" takes advantage of the factory roof rack, secure mounting locations to suspend a heavy duty aluminum platform over the roof. A specific benefit of the "CRMS" system is eliminating the requirement to mount the light tower directly to the roof on a reinforced panel using multiple roof penetrations that can increase leaking potential. The only roof penetrations are the weatherproof self sealing grommets for wiring.

As everyone knows, there are multiple manufacturers offering numerous LED warning lights and siren and control systems. For this demo Odyssey has chosen lighting from Code 3, Federal Signal, Sound Off, Whelen and some Odyssey specific LED lighting. Larry Kahan, Odyssey's founder and President states, "It is a great way to compare and demonstrate the different manufacturers products all on one vehicle. Each manufacturer offers their own style of equipment adapting to new vehicle designs and products. For over 30 years we continue to pioneer new ideas and applications for the emergency

services.” You can see a map of the products utilized and their locations on the vehicle at [www.odysseyauto.com](http://www.odysseyauto.com) in the demo section.

Manufacturing custom emergency vehicle cabinets for over 30 years, Odyssey systems have been, and still are in service many years outlasting the vehicle they were originally designed for. New for 2011 is a new lift up ratcheting command board with an LED light strip at the top of the custom fabricated powder coated aluminum module which will hold any 18” x 24” map. The LED lighting will illuminate when the command board drawer is opened, turns off when closed, and includes a switch when not needed.

You can see this new demo at many shows this year and can contact Odyssey’s sales department for more information at 800.535.9441 or email to [sales@odysseyauto.com](mailto:sales@odysseyauto.com).

If you are in MD, DE, VA, NC or SC you can also contact Odyssey’s dealer, Fesco Emergency Sales at 800-638-0926 or [sales@fescosales.com](mailto:sales@fescosales.com) who also have a new Odyssey demo with many of the same features and a different array of emergency lighting.

### **About Odyssey Automotive Specialty, Inc.**

Established in 1979 as the market pioneer, Odyssey of Wharton NJ manufactures first response EMS units, Fire Chief, Command units, Specialty law enforcement and commercial vehicles based on sport utility vehicles, vans, trucks, trailers, light and medium duty rescues. In addition to response and specialty conversions, Odyssey offers custom cabinet systems built to order and shipped to you for easy “Do-it-yourself” installation into existing vehicles.

***“The only limit is the imagination.”***
